

# EUROPE FOR FUTURE!

## About the project

Creating a balance between nature and people is one of the issues that should be the priority of all humanity on a global basis. It is obvious that problems such as environmental pollution and unconscious consumption will cause bigger problems in the near future if no action is taken. In order to help environmental organizations and governments fight these problems, society should also make necessary efforts and take individual actions. We are ready to do our best to protect the future of our world, which has been home to us since the beginning of humanity, and to fulfill our duty. In this project, we will learn to adapt sustainability principles to our lives and to direct our preferences correctly. Throughout the project, the activities will be held in a multicultural partnership with 6 different countries. This eTwinning page will accompany the Erasmus+ KA229 project titled with the same name "Europe for Future!"

## AIMS

Throughout the project, we will aim to:

- Promote the sustainability principles,
- Raise awareness about the environment and conscious consumption,
- Exchange good practices about sustainability in partner schools,
- Disseminate our Erasmus+ project results,
- Use English as a communication tool,
- Guide the pupils to be responsible citizens.
- Promote the use of ICT tools,
- Promote the multicultural awareness.

## WORK PROCESS

eTwinning will be used throughout the Erasmus + project as a tool for the learning outcomes to reach a wider audience and therefore more people to benefit from the project. Both students participating in international mobilities and those not participating will be active in eTwinning. It will also serve as a preparation platform before the each mobility. In the pages of our Twinspace, sections will be created for students to make pre-meetings. All materials prepared throughout the project will be uploaded to the related fields and will be kept ready for further use. In addition, the selection of the project logo and the winner of the essay contest will be presented on Twinspace and more students will participate in decision-making processes.

## EXPECTED RESULTS

- The presentations of schools, cities and countries,
- The project logo,
- Photos from the activities,
- The presentation of SDGs by the pupils,
- Competence in using the Web 2.0 tools
- E-books for memories from LTTs.
- Boosting problem solving and critical thinking skills
- Competence in leading groups and promoting teamwork.
